

THE LARGEST ITALIAN US CAR MEETING

**JULY, 11-12,
IDROSCALO (MILAN) ITALY**

The biggest US car meeting in Italy came back to the new wonderful location of Idroscalo (near Linate Airport at Milan) and it registered a great success with his free entry. The unstable weather forecast did not stop the 404 US cars which arrived from all over Italy (isles included – some friends arrived from Sardinia) and even from Switzerland, Austria and Germany Ceck Republic.

This event started on Saturday with the arrival of 86 cars; among them there were many Vans and PickUps with caravans. The main show was on Sunday: early in the morning, a lot of American cars really crowded the entrance to the Lake with their sparkling chrome-parts and their original colours.

There was really any kind of vehicle: '60s, '70s and '80s and modern cars, powerful Muscle Cars, PickUps, Off Roads, Vans, Oldies, Fifties, Pre-War, Hot Rods, Rat and Street Rods.

Cars continued to arrive till afternoon and at the end of the day we reached more than 404 cars.

The best cars were selected by the journalists jury of Cruisin' Magazine and more than 40 of them received a price.

The band Sniperdogs took care of the music entertainment.

The wonderful US cars were parked in the shade of centuries-old trees and the public could benefit of a relaxing and pleasant atmosphere.

Near to the exhibitors area there was even the demo ride area with the official Varese Harley-Davidson dealer which gave the chance to test different H-D models for free.

The company V8 Epocar created the "Movie Area" with the vehicles of the famous television series "The Dukes of Hazzard" and the lookalike of Uncle Jesse.

They even had the chance to test the custom bicycles, to refresh in the swimming pool, to go canoeing on the lake or to make a relaxing walk around the lake.

The organizers thank the owners of the location the company Ma-Fra which offered its products for the welcome bags and a great Sexy Car Wash, all participants and all those who made possible the success of this event, which contributes to the growing of the US car culture in Italy!
